

LUXORA™  
BY PG BISON

---

FIND THE BEAUTY WITHIN

There are those who have come to realise that real beauty is more than skin deep. For them, we've created Luxora™, an exclusive range of elegant, limited décor designs bonded to our innovative new NobleCore™ substrate.

This is a surface concept designed to elevate kitchen spaces, redefine beauty and elegance, but to still speak of strength and endurance.

If you're in search of a look and a feel that goes beyond mere beauty, read on.

## THE INSIDE STORY

As the name suggests, Luxora™ is a range of luxury worktops that combines beautiful, hardwearing laminates with our distinctive NobleCore™ substrate in a double-face construction.

The contemporary worktop surfaces are flat-bonded to the substrate, ensuring all four black edges of the NobleCore™ panel are visible. NobleCore™ is a rich black, high-density MDF, which can be machined and shaped by CNC, spindle or router, giving you the flexibility to shape the edges, and the worktop panel itself, as you like.

## INTERIOR APPLICATION

Luxora™ premium worktops bring the latest in world trends to within your grasp. The thinner calliper is perfect for slimline kitchen worktops and centre islands, as well as other tabletop applications.

Our new black NobleCore™ substrate offers a versatile canvas for decorative edge and panel shaping. And it is made using moisture resistant (MR) resin. While NobleCore™ is moisture resistant, it is best to seal the edges as per our guidelines, to ensure your installation lasts as long as possible.

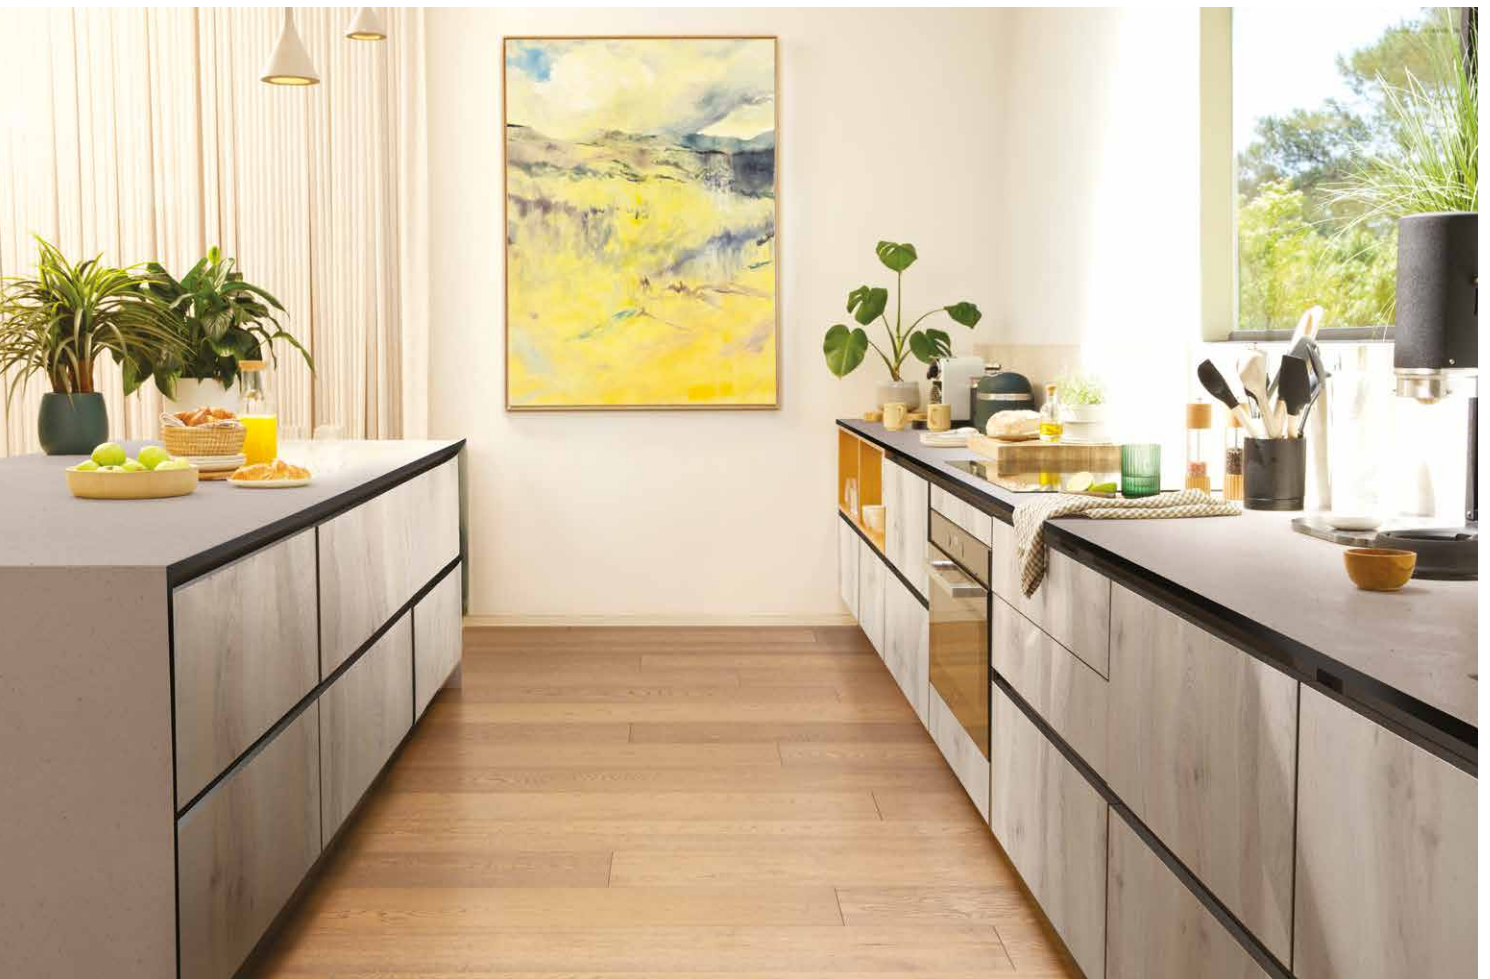

Both the 600mm and 1200mm wide tops are double-faced, having a decorative laminate on both surfaces of the panel, making them ideal for exposed applications such as waterfall downstands in breakfast nooks and centre islands.

## THE COMFORT OF HOME

Luxora™ is manufactured in South Africa by PG Bison and is engineered and crafted to international standards. It means you have the comfort of knowing this is a readily available product with the quality and consistency you have come to expect from PG Bison.

Luxora™ is supplied with a protective film to shield the decorative faces during handling and processing, so your finished product arrives on site looking as good as you deserve.

To ensure clean, hassle-free removal, the protective film on Luxora™ should be removed within one month from date of installation.

## UNLIMITED POSSIBILITY

Whether your imagination desires a refined straight edge or a custom shape like an oval boardroom table or a circular coffee table, NobleCore™ allows for seamless shaping and profiling. Fresh, effortlessly stylish and designed for creativity, Luxora™ is where beauty meets precision.
